Seamless Contactless Payments

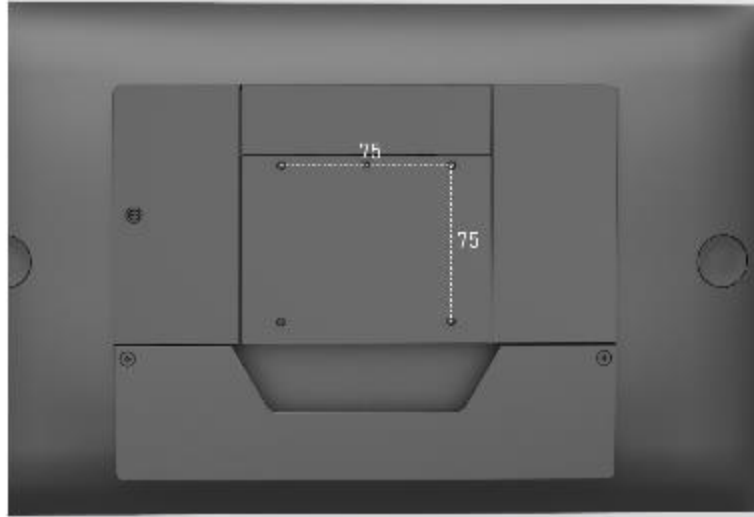

Flytech's NFC-enabled 2nd display for POS627 revolutionizes the payment experience. Customers can conveniently use their mobile phones, simply get close to the 2nd display, and enable the NFC function for secure and contactless payments. Enhance transaction speed, improve customer satisfaction, and provide a modern payment solution that aligns with the evolving needs of your restaurant and store.

** The NFC-enabled 2nd display is a project-specific option.*

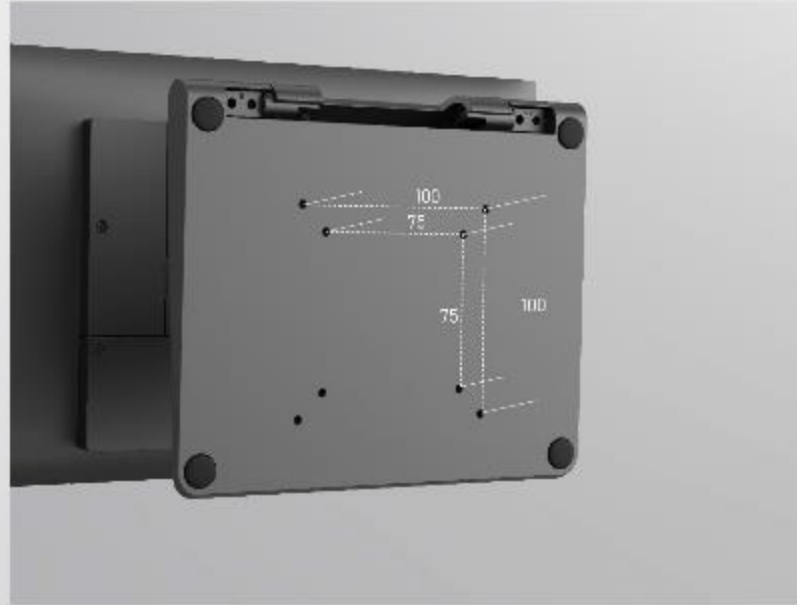

Flexible Mounting Solutions

Enjoy the freedom to customize your setup, whether it's mounted on the wall or placed on a different stand, maximizing convenience and adaptability for your operations.

The back of POS627 is equipped with a **75x75** VESA standard, allowing for seamless wall mounting or effortless transition to alternative stand options.

POS627 is designed with VESA standard compatibility, featuring **75x75** and **100x100** stand plate for easy wall mounting.
