

5G & Wi-Fi 6E | 32M Reading Distance | Cold Chain Solution (Heater Version) (Option) | eSIM available

Powered by Android 14 OS with GMS and AER Certified

The HT730 Plus is a rugged handheld terminal designed for one-handed operation. Running on Android 14 OS with GMS certification and Android Enterprise Recommended (AER), it ensures seamless compatibility with Google services and enterprise-grade applications. Powered by the Qualcomm® Snapdragon™ 4490 Octa-core processor, it delivers fast, reliable performance for demanding tasks, making it ideal for warehousing, logistics, and field service operations.

Seamless Connectivity with eSIM Technology

The HT730 Plus features eSIM technology, offering secure, convenient connectivity without physical SIM cards. Embedded within the device, the eSIM prevents loss or damage and enhances security. Network switching is seamless using a QR code or activation code via Wi-Fi, ensuring reliable connectivity for the dynamic demands of logistics, warehousing, and field operations.

Superior Performance with Extended Scanning Range

Specially designed for demanding workflows, the HT730 Plus features a powerful 32M scanning range, far surpassing standard devices. Supporting a wide range of barcode symbologies, including 1D, 2D, Dot Code, and OCR, it provides unmatched versatility for data collection tasks.

Designed for Harsh Conditions

Designed to thrive in tough conditions, the HT730 Plus boasts a durable construction with drop resistance up to 1.8 meters (or 2.4 meters with bumper) and IP65/IP67-rated protection against water and dust. Ideal for outdoor logistics, manufacturing, and rugged fieldwork, it ensures reliable performance in challenging environments.

Seamless Cold Chain Management Down to -30°C

Available as an optional feature, the HT730 Plus Cold Chain Solution is engineered for temperature-sensitive environments, supporting reliable performance in extreme cold conditions as low as -30 C. Its integrated heater module prevents condensation, ensuring consistent operation in freezing environments like cold storage warehouses, food distribution centers, and pharmaceutical logistics. This optional solution ensures the HT730 Plus maintains high efficiency and reliability where other devices might fail.

Enhanced Green Laser for Precise Aiming

The HT730 Plus features an advanced green laser aiming system, offering superior visibility and accuracy for barcode scanning. This enhanced laser ensures precise targeting, even in challenging lighting conditions, making it ideal for fast-paced environments like warehouses and logistics centers. With improved aiming clarity, workers can complete scanning tasks more efficiently and with fewer errors.

Features

- · Android 14 OS with GMS and AER certified
- · eSIM support for flexible and convenient connectivity
- Superior performance with the scanning distance up to 32M away
- Support -30°C cold resistance with the cold chain solution (option)
- Feature clear green laser aiming for precise barcode scanning
- Feature Bluetooth® 5.2, 5G & Wi-Fi 6E connectivity
- 1.8M drop-resistant housing (2.4M with bumper)
 IP65/IP67-rated protection against water and dust
- Durable keypad options with 38, 29, or 47 keys to meet versatile needs
- Supports 30-degree scanning tilt-down for ergonomic operation

HT730 Plus Software Solution

Development Tools

Scanner SDK

RFID SDK

EBrowse

Unitech offers a number of SDK toolkits for developers to write apps that can interact with the unitech devices for the mobile, scanner, and the RFID product lines.

Device Management

Staging and Management

MoboLink

Android Enterprise ready EMM for monitoring device health and managing apps, configs and files

StageGO

Barcode-based device staging utility offering hundreds of script commands for you to work with

OEMConfig

If you are using a third party EMM, OEMConfig will allow those EMM solutions to configure unitech specific settings on the device.

Enterprise Launcher

Secure your devices by kiosking them with Enterprise Launcher. Block access to the Android system and only allow limited number of apps to be run.

Battery info

Monitor advanced Battery health and manage the battery replacement cycle. Use with MoboLink to get real-time attery health alerts delivered to your phone.

Software Update

Check and install software updates online.

To let a device always stay up-to-date, setup the device to automatically check and install for updates on boot up.

System Update Center

Check and install firmware updates via FOTA. You can update the firmware via online FOTA server, or by using a OTA ZIP file placed in the internal storage.

TagAccess

For versatile functions of RFID command via integrating with Unitech RFID Readers.

ScanBridge

A powerful scanner app for iOS, Android and Windows. Easy pairing, auto setup, advanced editing and validation tools streamline your scanning.

Productivity and Utilities

USS

USS Profiles

Configure all scanner settings with friendly user interface and enable the service to make scanning data as keypad input.

UNote

A simple text viewer and editor for use in your work flows.

USS Camera

Capture barcode data using the device camera and send the data to your applications as keyboard inputs

KeyRemap

Reprogram physical buttons to act as another key or to launch an app.

WLAN Advanced

Configure advanced WLAN settings such as power saving mode and roaming parameters.

NTP Server Settings

Customize the NTP server setting to keep your device date and time synchronized.

Startup

Auto-run apps when device boots up.

Unitech Scanner Utility

An Android application which helps users connect, configure and use a supported Unitech Bluetooth scanner.

Logger

An easy and fast way to get logs from a device.

Enterprise Keyboard

Enterprise Keyboard gives various methods for user to input data to enhance efficiency and productivity.
